

Eagle Telemedicine Night Shift Solutions

Are you losing sleep over night staffing challenges?

Let Eagle Telemedicine save the day (and nights).

The Seamless Solution to Physician Shortages

Eagle Telemedicine is solving night staffing challenges for hospitals of all sizes. Whether you're a small rural hospital, a mid-sized facility, or a large metropolitan hospital, our telenoctrurnist team can cover staffing gaps and provide invaluable support for nighttime clinical teams.

Four Models for Success

We offer a portfolio of specialized solutions to fit the needs of hospitals of all sizes:

- **Telenoctrurnists.** In rural locations, patients receive real-time diagnoses and treatment at night from expert telenoctrurnists who are "beamed in" to the hospital via videoconferencing technology. The hospitals no longer have to struggle to find nocturnists to work on site, and no longer burden (and alienate) their daytime doctors with nighttime call.
- **Telecross-Coverage™.** Nocturnists often have to be in two places at once in larger hospitals: handling admissions and rounding on patients in the ED, and providing cross-coverage consults by phone. Take the burden of floor calls off your nocturnist team and improve quality of care with face-to-face consults via videoconferencing technology.
- **Eagle Surge Protection™** offers access to expert hospitalists whenever you need them—with the click of a mouse. It's ideal for rural hospitals with limited local physician resources, or metropolitan hospitals where surges can happen any time, day or night.
- **Collaborative Care.** Eagle Telemedicine supports NP/PA management by providing access to physicians offsite who can guide and advise your staff in providing comprehensive local care. Eagle telehospitalists participate in daily and nightly rounds via live videoconferencing, and are available 24/7 as a part of your clinical team. This reduces unnecessary transfers, boosts patient volume, and increases expertise and confidence of medical staff.

Reduce Burnout, Increase Performance

In the nighttime care domain, telemedicine provides balance, easing the load for existing staff and ensuring that your standard of quality extends around the clock. It's a seamless solution to the physician shortage that Eagle Telemedicine innovated, and one that is reducing toxicity of night coverage for our hospital partners today.

We offer a portfolio of specialized telemedicine programs, including:

- Telenoctrurnists
- Tele-ICU
- TeleStroke
- Telepsychiatry
- NP/PA Back-Up

**Eagle Telemedicine:
Complete Care,
Always There.**
