The United States is facing a dramatic increase of Intensive Care Unit (ICU) patients and a simultaneous shortage of qualified ICU intensivists. Eagle Telemedicine works with hospitals to provide remote access to skilled physicians, resulting in demonstrable improvement in patient care and administrative efficiency.

**THE HARD FACTS**

**ON THE RISE**
More than 5 million patients are treated in ICUs each year

**5 MILLION**

**MORE SURVIVE**
When intensivists manage all ICU patients, a 40% reduction in mortality rates is achievable

**40%**

**HOWEVER**
Most hospitals cannot afford to staff their ICUs at this level for 2 reasons

**COST**
Typical 24/7 ICU coverage requires 4 providers and costs about $1.2 million

**$1.2 MILLION**

**SHORTAGE**
Estimates predict a shortfall of 30% of the needed intensivist workforce

**SOLUTION: TELEMEDICINE**

In the United States, more than 500,000 patients are monitored annually via teleICU

34% of healthcare organizations cite telemedicine as their top future investment

As a 15-year industry veteran, Eagle Telemedicine provides access to offsite ICU physicians who provide expert care via cutting-edge technology

Eagle’s teleICU approach is helping one hospital reduce traditional intensivist staffing by 75%

**BENEFITS**

**REALIZE COST SAVINGS**
reduce unnecessary transfer of patients
create collaborative coverage models with local physicians

increase patient volume

achieve ROI with incremental DRG reimbursement

**IMPROVE QUALITY & CARE**
provide 24/7 access to expert ICU physicians

manage gaps in intensivist coverage

increase compliance with Leapfrog standards and establish best practices

guarantee response time of 15 minutes or less for emergencies
