

Eagle Telemedicine Programs

Why is Eagle the Only Telemedicine Partner You'll Ever Need?

The Seamless Solution to Physician Shortages

Eagle Telemedicine is solving staffing challenges for hospitals of all sizes. Whether you're a small rural hospital, a mid-sized facility, or a large metropolitan hospital, our telemedicine team can bridge any gaps in staffing or specialties.

An Integral Part of Healthcare Today

A pioneer in inpatient telemedicine, we have spent nearly a decade perfecting our telemedicine models of care. The benefits are clear: Administrators like the cost savings and the way telemedicine helps them deal with the constant challenges of the physician shortage. Physicians appreciate the work-life balance and the quick access to specialists that telemedicine provides. And our surveys find that over 95% of patients, after their first telemedicine experience, say they would recommend it to family or friends.

Telespecialties: Expand Your Scope of Services

We offer a portfolio of specialized telemedicine programs, including:

- **TeleHospitalists.** We provide an efficient, highly functional alternative to nighttime care in hospitals. Instead of having daytime hospitalists on-call, patients receive diagnoses and treatment immediately, without having to wake the daytime doc.
- **Tele-ICU.** With more than five million patients treated in ICUs each year and the supply of qualified ICU intensivists on the decline, our telemedicine program offers help to hospitals.
- **TeleStroke.** When it comes to acute stroke, time is brain. We offer a top-notch program that can make any hospital a center for quality, rapid-response neurological care.
- **TeleCross-Coverage™.** Nocturnists often have to be in two places at once: handling admissions and rounding on patients in the ED, and providing cross-coverage consults by phone. Eagle TeleCross-Coverage™ takes the burden of floor calls off your nocturnist team and improves quality of care.

More Than Technology

It's not just the "always on" technology that makes telemedicine great. We assign our telemedicine physicians in small groups for a particular specialty or facility. They get to know the hospitals to which they are assigned, and the hospital clinical teams get to know them on a first-name basis. Successful telemedicine physicians are first and foremost effective communicators, and the Eagle Team puts patients at ease with their remote bedside manner.

GROWING SUCCESS IN TELEMEDICINE SPECIALTIES

We offer a portfolio of specialized telemedicine programs, including:

- **TeleHospitalists**
